SMITHS INTERCONNECT ANNOUNCES LEGAL ENTITY CONSOLIDATION AS NEXT STEP SUPPORTING SINGLE BRAND IDENTITY AND SIMPLIFIED CUSTOMER INTERACTION

Smiths Interconnect, a leading provider of technically differentiated electronic components, subsystems, microwave and radio frequency products, announces a further step toward improving the customer experience by merging historic legal entities into one. Beginning August 1, 2017, the legal entities "Interconnect Devices, Inc." and "Smiths Interconnect Microwave Components, Inc." will legally become "Smiths Interconnect Americas, Inc."

Earlier this year, Smiths Interconnect became the official brand name for all products formerly known by the brand names EMC, Hypertac, IDI, Lorch, Millitec, RF Labs, Sabritec, TECOM and TRAK.

"The Smiths Interconnect brand was launched in March to unite our broad product portfolio and services under a single brand identity," commented Jeff Dick, Vice President of Marketing for Smiths Interconnect. "This legal entity consolidation is an important first step in supporting that transition process because it will simplify customer interactions with Smiths Interconnect. Customers will benefit by having fewer points of contact for sales and other key business functions. We will continue to evaluate additional actions including further legal entity consolidations to ensure an easy customer experience with Smiths Interconnect."

"It is important to note that customers will still be able to buy all the same products that they purchase today," added Paul Harris, Vice President of Sales for Smiths Interconnect. "By consolidating our legal entities, we are streamlining customer access to the products they use now plus many more across our entire offering."

To make the process as smooth as possible for customers, several communications have been issued as well as a reference of [Frequently Asked Questions \(FAQ\)](#). Customers are encouraged to contact their Regional Sales Manager, Customer Service Representative or info.us@smithsinterconnect.com with any questions or concerns.

About Smiths Interconnect

[Smiths Interconnect](#) is a leading provider of technically differentiated electronic components, subsystems, microwave and radio frequency products that connect, protect and control critical applications in the commercial aviation, defense, space, medical, rail, semiconductor test, wireless telecommunications, and industrial markets. Smiths Interconnect is synonymous with exceptional performance whenever a technologically advanced, high quality solution is required to ensure reliability and safety.

Smiths Interconnect is part of [Smiths Group](#), a global leader in applying advanced technologies for markets in threat and contraband detection, energy, medical devices, communications and engineered components. Smiths Group employs approximately 22,000 people in more than 50 countries.
